

TEBQ30G 30" Outdoor Gas Grill

TEBQ42R 42" Outdoor Gas Grill

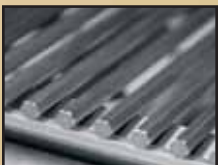

Standard Features for 30" & 42" Outdoor Gas Grills

Radiant and Direct Heat. Radiant heat from our high quality ceramic briquettes mixes with direct heat for more thorough and flavorful cooking. The briquettes distribute heat more evenly while the direct heat allows your grill to preheat faster and get hotter while using less gas.

Zone Dividers. Each burner is individually contained to control heat independently from one area to another. You will be able to maintain each zone with a different temperature or effectively cook with only one burner operating.

Hexagonal Grates. Our grills feature 3/8" stainless steel hexagonal grates which retain more heat, enabling more heat contact to food for even cooking. Plus, these grates generate dark, deep, professional restaurant-style sear marks.

Hot Surface Ignition. Lighting the gas burners and the rear rotisserie burner just got easier with electric hot surface glow plug ignitors. The more reliable ignitors operate by pushing in the burner or rotisserie control knob.

Hood Assist System. Concealed heavy duty extension springs allow for easy opening and closing of the hood by reducing the weight load.

Smoker Box. Convert your gas grill into a barbecue smoker. Sealed Smoker Box holds liquid for soaking hickory, mesquite, or your favorite woodchips to give meat Smokey flavor.

LED Lights. Blue decorative lights illuminate the control knobs turning your grill into the main attraction, even when not in use.

Lights. Two halogen lights illuminate the cooking surface. Advantageous for the evening barbecue, eliminating the need for external lights that may disrupt the ambience of your gathering.

Light Switch. Additional switch automatically turns interior lights off when hood is down to add longer life to your lights.

Additional Features:

Warming Rack. Three position warming rack which conveniently stows away when not in use.

Double Wall Hood Construction. The hood is double lined on the front, top, and both sides for better insulation and to prevent exterior discoloration.

Sear Zone. TEBQ30 and TEBQ42 available with or without Sear Zone. 25,000 BTUs of Direct Heat will sear your meats faster and deeper to seal in more juices. More juices means moist, more flavorful food.

Rotisserie. TEBQ30 and TEBQ42 available with or without infrared rear rotisserie burner (B) and rotisserie set (A). Two position system maintains proper distance from the infrared burner to control efficient browning. 100 lb. turning capacity

TEGB42SD 42" Outdoor Gas Grill Base

Standard Features for 30" and 42" Grill Bases

Twin Eagles 30" and 42" grills are available with integrated grill bases for a portable freestanding grill option. The grill bases beautifully match grills and accessories. Standard features include soft closing doors and self closing drawers (drawers not available on TEGB30), heavy duty casters with front brakes for easy maneuverability and locking, and fold down side shelves with tool holders. The pull-out tray inside can be used to hold a trash receptacle or LP tank. Access doors and storage drawers feature flush handle design with hi-polished accents.

Tool Holders. Both side shelves have specially designed tool holders to keep your tools handy, yet conveniently out of the way, so your side shelves may be used for other items essential to grilling.
