

Tankless Water Heating Solutions
For Consumers

Rinnai

Recirculation Solutions for Faster Hot Water

NO MORE WAITING FOR HOT WATER.

ThermaCirc360™

Wait less. Waste less.

HERE'S HOW IT WORKS

Regardless of whether your existing plumbing system has a dedicated return line, you can enjoy faster hot water through recirculation.

Rinnai offers the option for you to either set your recirculation schedules according to high-demand times or for you to utilize on-demand recirculation through the use of push buttons and motion sensors.

HOT WATER ON YOUR SCHEDULE

Many Rinnai tankless models come standard with recirculation technology, a built-in feature that lets you activate recirculation during times of high hot water demand.

You can activate recirculation with smart home devices, push button technology, or with motion sensors that detect when family members are present. Both connect to your system wirelessly to trigger recirculation only when you need it.

Residential Water Heating Solutions

About
the size
of a small
suitcase

THE SMART CHOICE IS THE #1 CHOICE

Rinnai's commitment to quality has made us the #1 selling tankless water heating brand in North America.

Put worrying about hot water out of your mind

Your family can enjoy hot water from anywhere in your home. Two showers running at once? Laundry and dishes at the same time? Not a problem.

More space for you

Only the size of a small suitcase, our wall-mounted models can be installed in compact spaces in both indoor and outdoor locations. They take up less space for heating, giving you back more space for living.

Family-friendly, earth-friendly

Our efficient and compact technology helps conserve natural resources, including water, while reducing waste in landfills. Lower CO₂ emissions produce a smaller environmental footprint.

Save on energy while boosting your home's value

- Operates only when hot water is needed
- No pilot light and no storage tank to heat and reheat water
- Save up to 40 percent on energy bills*
- Increase your home's value with high energy efficiency, an improved Home Energy Rating System (HERS) Index Score and optimized LEED eligibility
- Quality for energy rebates and tax credits

*As based on the average cost to run an electric tank water heater per the Department of Energy (DOE) Average Energy Costs (doe.gov) 2017

A Closer Look at the Comparison

INEFFICIENT TANK WATER HEATER

Limited capacity means
limited hot water supply

Wastes energy by heating water again
and again, whether you need it or not

Failure often means **leaks**,
which can mean costly damage

Big, bulky and takes up valuable space

RINNAI TANKLESS TECHNOLOGY

Delivers **endless supply of hot water**

Heats water only when you need it,
saving **significant energy costs**.

Lasts **2x longer** than a tank*
and has lower repair costs

Frees up **more space** in your home.

The lifespan of one Rinnai Tankless Water Heater compared to
the lifespan of a traditional tank water heater.

STANDARD 40-GALLON GAS TANK
WATER HEATER

Roughly the size of a
small suitcase

*Based on DOE ENERGY STAR® life-cycle estimates.

Smart Home Automation

Control-R Wi-Fi Module

WI-FI TECHNOLOGY

Included with the SENSEI™ RUR models, the Rinnai Control-R™ Wi-Fi Module gives you control of your hot water from anywhere in the home via a smart device.

Downloading the Mobile App and adding Rinnai's Control-R™

Wi-Fi Module also allows owners to integrate with smart home devices such as Amazon Alexa, Google Home, and Samsung SmartThings on new and existing Rinnai Residential and Commercial Tankless Water Heaters (2006 and newer).

- Control and monitoring
- Remote diagnostics and maintenance
- Accessibility and convenience
- Available as accessory for other Rinnai Tankless models

SMART HOME ROUTINES FOR CONVENIENT CONTROL

- Voice Activation (20+ Unique Phrases)
- Adjust Water Temperature
- Turn on/off Recirculation System on Tankless Models featuring ThermaCirc360™ or Circ-Logic
- Schedule Recirculation
