

NEW!

Ultimate StovePipe™

All-Fuel, Double Wall Chimney Connector System

The Ultimate connection between your woodstove and insulated chimney.

Ultimate StovePipe™ is designed for the hearth professional. It goes together easily and provides optimal performance with a sleek, smooth, clean appearance to compliment any wood stove.

Features

Air-insulated, double wall design - 7/16" air space:

- Provides better insulation & heat retention
- Allows flue to warm up quickly to establish strong draft
- Reduces moisture to minimize creosote build-up and minimize maintenance

Stainless steel inner liner warms quickly, holds the heat in and provides corrosion resistance

Smooth welded inner and outer seams provide a sleek, clean appearance on all components - pipe lengths, elbows and tees - to compliment any stove and home interior

Satin coat steel 0.018" outer casings specifically designed for optimum paint adhesion and scratch resistance

Easily fits most stoves, including cast iron stoves and stoves with oval collars

Pre-drilled pilot holes for fast installation

Components individually packaged
