TYPE OF FIT

The **Z-Track**, **Z-Phantom**, **Z-Door**, **Z-Decor** and **Z-Classic** are inside fit only. The **Z-Track**, **Z-Phantom** and **Z-Decor** will be 1/8" smaller in width and height including Air Studs.

The **Z-Door** and **Z-Classic** are factory-built to allow 1/4" cooling air intakes between the outside of frame and inside of fireplace on all four sides.

The **Z-Laser** and **Z-Heritage** models will overlap the opening by 1/4"-3/4" on both sides, top and bottom. Factory may allow other clearances based on the exact specifications of your zero-clearance fireplace.

INSET DEPTH

This is the distance from the face of the zero-clearance fireplace to any existing obstruction inside the opening. The inset depth affects the amount that the enclosure will fit into the opening. For example, the Z-Door frame is 1-1/8" deep. If the inset depth is 1", the face of the enclosure will protrude 1/8" from the firebox.

WARNING: If the inset depth is less than 3/4," the enclosure may not fit properly nor fit at all!

CHECK IF APPLICABLE

- Marble, tile, brick or stone protrudes into opening.
- Hearth is flush with bottom of opening.
- Louvers (circular model)
- Triple Wall Pipe Model
- Through Frame mount required (Z-Door and Z-Classic only)
- Air Draft Bar required (Z-Door and Z-Classic only)
- Obstruction prevents overlap (Z-Laser and Z-Heritage only)
- Box tapers immediately
